Grid Reference: 241688 803379 Distance to nearest turbine: 11122m AOD: 808m

This viewpoint is located approximately 6.8km southeast of Fort Augustus.

Head south out of Fort Augustus on the B862 towards Whitebridge, Dore, and Foyers. After approximately 2.5km look for the parking area on the right hand side as you climb a hill up through a pine plantation on your left. Park here. Join the path from the gate at the bottom end of the layby and turn left along this. It crosses the moorland, then runs along the outside of a plantation, to reach the main hydro track above the complex of buildings. Turn right along the hydro track.

From this point on it is strongly recommended that the user sources designated mapping for this walk. There are several websites detailing walks to the summit of Carn a' Chuilinn.

The camera location is just below the summit on a patch of grass.

Extent of 50mm single frame

Photomontage

Figure 4.9i
Viewpoint 2
Carn a' Chuilinn

Distance to nearest turbine: 7116m Camera: Nikon D810 Focal Length: 50mm vertical (27°) x 28mm horizontal (65.5°) Camera height: 1.5m Date: 11/05/2018 13:40

The images contained on this page and the following page are not representative of scale and distance from the actual viewpoint and show the wind farm development in its wider landscape context only.

For empirical testing, the wireline image on the next page can be accurately assessed in the field when converted to a transparency. If viewed with one eye at a distance of 300mm from exactly the same location and height as the original camera lens, the image will fit the real landscape cues.

Extent of 50mm single frame

Photomontage showing proposed development and consented Stronelairg development
